

Mining

Thinking about a career in the Mining industry?
Some questions you could expect:

What attracts you to this position?

Why should we take you on?

What skills do you have that directly relate to this position?

What are your strengths?

Have you ever worked FIFO and more particularly 14 x 12hr consecutive shifts?

How do you feel about working in isolation/ remote locations?

Being away from home for weeks at a time places a strain on family life. How do you believe you will handle this and more importantly how will your family?

How do you feel about working in a strict hierarchical structured environment?

If you observed a fellow employee performing a task unsafely what would do?

What is most important to you in a Position? Company? Opportunity? Why?

Where do you see yourself in 2 or 3 years?

What pay rates/ rosters are you chasing and which areas/ companies do you hope to work in/ for?

How long are you looking to commit to this position?

Do you have any commitments such as holidays booked etc that would prevent you performing this roster in the next 12 months?

What is your availability / notice:

Do you have any questions you would like to ask?

Is it ok to contact your referees?

MEDICALS AND TESTING

What to expect

General Medicals

To determine your level of health and well being

Physio Test

To determine your general mobility and or injury assessment

Drug and Alcohol Test

Mining has a zero tolerance to drugs and alcohol. When you are tested your blood alcohol level needs to be zero and no registration of drugs in your system.

PLEASE NOTE:

Drugs will show up in your system for **THREE MONTHS** or longer after you have used them!!!!
